CSP584 final project phase_3

1.Brief project overview statement and requirements:

this final project is to design a Meal delivery app similar to GrubHub and UberEats, Use AI and ML to predict best route and ETAS.

There are several requirements such as

- Register
- Login
- Logout
- Import restaurant data from Yelp API and display related restaurant list based on the zip code inputed on the searching bar
 - select the restaurant, show the menu of the restaurant
 - make the order, confirm the order by inputing user name, delivery address, bank information, check out
 - display the delivery route
